

## GABEL, always at the highest levels

One more extraordinary success for GABEL athletes

The twenty-one years old Michaela Essl, from the ASKIMO team, won the gold medal at the skimountaineering world championships in Andorra. In the picture the challenging performance of Michaela with our PIERRAMENTA CARBON.

The declaration of Mr Karl Posch, President of ASKIMO: "The bronze medal was expected as a great achievement for the team, but today the history of Austrian Skimountaineering has been written. In the women's individual competition, the twenty-one Michaela Essl has conquered the gold medal in her class, becoming World Champion!"

GABEL, always at highest levels of international competitions, now with its line of skimountaineering products, wish to thank Michael and the ASKIMO team for these priceless emotions.
